For unique or custom installation layouts, please contact our JWA team on 1800 264 628.

CHOOSE ANCHOR TYPE

Installing On Grade, Dirt, or Sand

Round Head Stakes

Concrete Form Stakes w/ Pin & Washer

Installing On Concrete or Asphalt

Concrete Screw Anchors

Expandable Sleeve Anchors

Recommended Tooling

Stake Anchors*	Screw Anchors	Sleeve Anchors
Concrete Rotary Hammer Drill	Concrete Rotary Hammer Drill	Concrete Rotary Hammer Drill
3/4" Drill Bit	3/4" Concrete Drill Bit	3/4" Concrete Drill Bit
Sledge Hammer	Impact Driver	Impact Driver
Pins and Washers*	1-1/8" Socket	15/16" Socket
		Sledge Hammer

Recommended 4 anchors per mat based on substrate.

*Pins and washers are required when using concrete form stakes.

Before using earth anchors, use the free Dial Before You Dig service at www.1100.com.au

MAINTENANCE

To ensure continued performance, FODS mats should be regularly inspected and maintained. Mats should be cleaned before voids between the pyramids fill up with sediment above the base of the mat. In most cases, the existing street sweeping process can be used to clean the mats. Commonly a street sweeper or skid steer with a broom attachment are used. Adjustable heads on the street sweepers may be required to effectively remove sediment from between pyramids.

A FODS shovel is also available for manual cleaning. The FODS shovel is shaped to fit between between pyramids which are aligned in rows.
